#TechTip – URL Shortener

Do you have a long web address that you'd like to share, but it's just SOOO long?
Use a web address shortening tool!

For example:
https://docs.google.com/forms/d/1T21MyE949VLY0dH4Mub7kExVfTsxG9EnStiMWkTmSu8/viewform

You don't want someone to have to type that all in if there isn't a link to click on.

Visit a site like www.tinyurl.com

Highlight and copy the link you want to share.

Paste your link in here!

Enter a long URL to make tiny:

https://docs.google.com/forms/d/1T2   Make TinyURL!

Custom alias (optional):

http://tinyurl.com/ hcoxfeedback

May contain letters, numbers, and dashes.

Choose an ending that matches your link.

Once you hit the button, **Make TinyURL**, you'll have a new link.

Share the shortened link with your users and it will direct them back where you want them to go!

Both of these addresses will take you to the same place!
